## Steam and Condensate Systems

The Triosim Technical Service group is an authorized distributor and certified service provider for *Deublin* steam and condensate equipment. Our dryer services now include, superior turnkey dryer TAPPI fit for service inspections, routine annual internal inspections, dryer steam joint repairs and rebuilds,

dryer steam joint audits, dryer turbulator bar repairs and installations, dryer bearing and gear replacements, dryer steam leak repairs, and Deublin parts, components, and technical support.

## Specialized Services

- Our certified technicians can rebuild your rotary steam unions in our shop or in the field.
- TRIOSIM only uses *Deublin* OEM parts to rebuild your steam unions at list price.
- We currently offer steam union exchange programs to new and existing customers.

Working closely with world-class paper manufacturers and machine builders, *DEUBLIN* revolutionized the paper industry by pioneering stationary siphon technology for removing condensation from high-speed paper machines dryer sections. With more than 17,000 successful installations world-wide, *DEUBLIN* stationary siphon systems have become the system of choice with many of the world's most productive paper makers.

Now *DEUBLIN* introduces the enhanced *DEUBLIN FSU™* steam joint and stationary siphon system, engineered as a complete and integrated unit to offer several distinct advantages.
