## Stainless Steel Banding

Triosim offers a broad range of corrosion-resistant facewire banding that is supplied to your specifications.

You will simplify stocking, eliminate measuring, cutting and waste. Triosim will pre-cut your banding to fit your washers, and custom pack your order so it is stocked, ready-to-use and protected from mishandling and contamination. If you prefer, we can supply your banding in coil lengths up to 500 feet.

Contact Triosim about facewire replacement services, including consultation, installation and/or supervision.

### Triosim Provides Expert Alignment Services

Less-than-perfect alignment of your drive systems causes wear and premature failure of couplings, bearings and motors. Triosim employs state-of-the-art laser technology to assure your systems are operating at optimal alignment. We specialize in shaft and motor coupling alignment, but will be happy to discuss with you the application of this technology anywhere in your plant.

Whether your requirements are for equipment in place, or for services during installation, we will provide complete and accurate and complete alignment.

Triosim Stainless Steel Banding is custom cut to your required length, then packed and shipped in individual cartons. We can also supply equipment such as self-crimping tensioners for easier installation.

- Banding is available in 6% Moly, 317L SS, and 316 SS
- Supplied in thickness of .020" and .030"
- Available in widths of 1/2", 5/8" and 3/4"
- Banding is cut to any length, up to 500' and supplied in coils.
