

Replacement Parts Service

For an Imperfect World

TRIOSIM
CORPORATION

Go Further with Triosim

There are no emergencies in a perfect world. Equipment failures are unknown. Maintenance shutdowns sail by without a hitch. And, of course, the OEM ships replacement parts at a moment's notice.

For those of us who don't live in a perfect world, responsive service is key to navigating the challenges of equipment maintenance. This is why Triosim offers an extraordinary program for replacement parts.

We do this by answering your calls twenty-four hours a day, seven days a week. When time is critical, your order is expedited in every way possible and your shipment will be tracked, right up until the time it arrives safely at your plant.

On maintenance shutdowns, at the request of a customer, Triosim arrives at the mill site with an assortment of appropriate parts that, as work and inspections progress, may be required to complete maintenance tasks.

These consignment part boxes are a convenient and cost effective way of insuring that maintenance and repairs are completed efficiently. Parts that are not used are simply returned to Triosim and re-stocked at no charge. This enables us to complete work without delay in the event of a parts shortage. And, this allows the customer to either pull from existing stocks or from our supply, to avoid depleting the mill's inventories.

Call on Triosim for any spare parts requirements and to discuss options for your mill that will make your shutdowns run more efficiently.

Triosim Parts are guaranteed 100% for quality and fit and are manufactured in the U.S.A.

Consignment Part boxes are a great way to have an assortment of parts on hand that may be needed at a moments notice during a maintenance outage.

- 24 hour call center
- Consignment boxes eliminate long lead times
