New Rotors

Triosim has their own patterns to furnish castings for new rotors, rotor caps and rotor hubs for replacement applications. Our new design rotors provide energy savings and extended life of the product.

New Rotor

New Rotor

New
Fabricated Rotor

Rebuilt Rotors – Save 40% - 60% over New Rotors

We build up the worn surface of the rotor using specialized welding procedures and re-machining the rotor to original specifications.

We install new faceplates and wear strips with Stellite® the most durable metal surface available for longer, more dependable life.

Rebuilt Rotor – Before

Rebuilt Rotor

New Thicker Faceplate

Triosim has a thicker faceplate design – up to 25% to 50% longer and better wear life.

- Save 40% - 60% over new rotors
- Thicker faceplate design
- Up to 25% to 50% longer wear life
- Longer life and better wear
- Specialized welding and rematch
- New design rotors that offer energy savings and extended life.
