Non-Destructive Testing (NDT)

The Technical Services Group, a division of TRIOSIM offers a comprehensive range of inspections, including non-destructive testing (NDT). This type of inspection helps customers make informed decisions based on the condition of their equipment. NDT is a technique that can save money and time in product evaluation, troubleshooting, and research.

Utilizing our expertise in the field, Triosim's non-destructive testing methods help our customers achieve

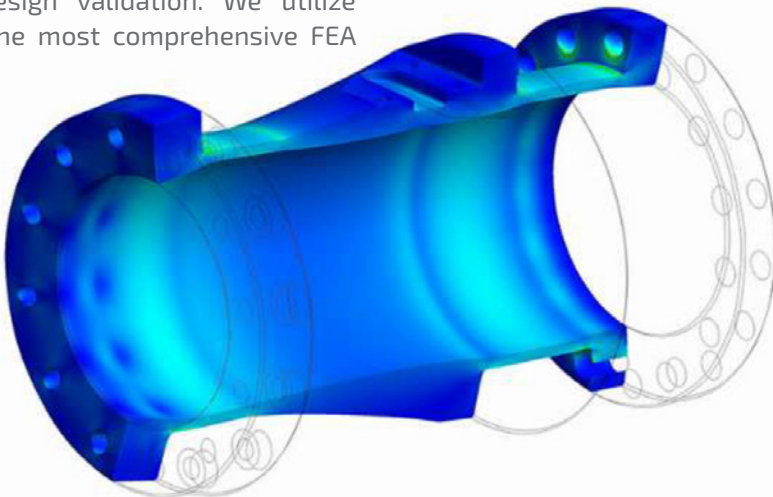

- Safety goals
- Control risk
- Minimize downtime
- Production targets
- Maintain quality
- Prevent property loss

Finite Element Analysis

The Triosim Technical Service group offers Finite Element Analysis (FEA) services to validate the fitness of your existing design or assist with initial design validation. We utilize one of the most comprehensive FEA

packages available. Validating your design to ensure that it's capable of handling operating conditions can save valuable time and money.
